EDUCATION

California State University Northridge

Bachelor of Science, Computer Science

TECHNICAL SKILLS

- **Primary Programming Languages:** Python, JavaScript, HTML, CSS, C#
- **Frameworks:** Next.js, Express.js, Django, Flask
- **Libraries:** React, Vue.js, Axios, Cheerio, JQuery, Pandas, Material UI, Bootstrap
- **Tools/Others:** Git, GitHub, Node.js, API, MongoDB, Visual Studio Code, Figma

PROJECTS

Reddit Bot Article Summarizer

Python, API's (OpenAI, PRAW) | <https://github.com/JayNode/summarize-reddit> June 2024 – Sept 2024

- Developed a Reddit bot to analyze and scan posts within specific subreddits, identifying relevant articles and generating concise summaries.
- Leveraged OpenAI's GPT-3.5 Turbo to create efficient, AI-driven summaries of articles.
- Implemented web scraping techniques to extract and process data from articles for summarization.

Video Game Recommendation Discord Bot

Python, API's (OpenAI, Discord, Steam) | <https://github.com/JayNode/VGRB> Feb 2024 – May 2024

- Created a Discord bot that recommends video games by integrating Discord API, Steam API, and OpenAI API.
- Leveraged OpenAI's GPT-3.5 Turbo to create a recommendation system that suggests games and genres based on user data from their Steam library.
- Optimized data handling and processing pipelines to ensure efficient retrieval and analysis of user data.

Fabled Fieldguide

React, JavaScript, HTML, CSS, MongoDB, Figma | <https://github.com/JayNode/FFG> Feb 2023 – Nov 2023

- Produced an interactive website to make learning about and contributing to environmental conservation enjoyable.
- Implemented secure user login and sign-up functionalities using MongoDB, ensuring efficient data management and user authentication.
- Designed creature personas in Figma to represent various environmental topics, enhancing user engagement by 20%.

EXPERIENCE

Quality Assurance Internship

5Head Games – Enders Gate Jan 2024 - May 2024

- Black Box stress testing the Beta version of Enders Gate
- Regression testing and created reproducible cases to submit to the development team
- Reduced worktime by 10% for development team due to familiarity with codebase

Account Manager

Warren Inc. Oct 2022 – July 2023

- Communicated with client 'Verizon' regarding sales reports, customer retention metrics, event opportunities, and saturated territories
- Trained, mentored, and supervised the operations of seven salesman for \$22k weekly product sales
- Increased customer retention by 17% by changing company standards regarding cold-calling and door-to-door interactions
